PROFESSIONAL SUMMARY

Results-driven Data Analyst with a strong foundation in transforming complex datasets into actionable business insights. Proficient in robust data manipulation, visualization, and reporting using SQL and Python (Pandas). Experienced in automating data extraction pipelines and deploying machine learning models to enhance analytical capabilities and support strategic decision-making.

PROFESSIONAL EXPERIENCE

Darshand Digital Solution

Pune, India

Intern - AI-ML Developer (Data Focus)

Feb 2026 – Aug 2026

- Developed an NLP-driven data extraction pipeline to analyze unstructured client communications, transforming raw text into structured relational datasets for downstream analytics and reporting.
- Designed an automated data synchronization microservice for the SpectraSynth CRM, enabling real-time analysis of high-volume external data payloads and improving data accuracy.
- Collaborated on the data architecture for a large-scale Enterprise Resource Planning (ERP) system, focusing on centralizing workforce analytics and optimizing database schemas for complex querying.
- Led and managed a cross-functional technical team of 4-5 developers, overseeing project delivery and operational reporting.

EDUCATION

Suryadatta Institute of Business and Management

Pune, India

Master of Computer Applications (MCA) | CGPA: 7.69

2026

Kaveri College of Arts, Science and Commerce

Pune, India

Bachelor of Business Administration in Computer Applications (BBA-CA) | CGPA: 7.92

May 2024

TECHNICAL SKILLS

- **Languages:** SQL (MySQL, PostgreSQL), Python, Java.
- **Data Analysis & ML:** Pandas, NumPy, PyTorch, Transformers (Hugging Face).
- **Database & Architecture:** Relational Database Management, Schema Optimization, Sequelize ORM.
- **Tools:** Git, GitHub, VS Code, SQLite, Linux.

PROJECTS

SpectraSynth CRM Analytics Pipeline

Python, MySQL

- Architected a commercial CRM data pipeline, featuring automated chemical data extraction for advanced trend analysis.
- Engineered an asynchronous email ingestion system targeting the sales department accounts, enabling structured data analysis of lead generation efficiency.

Desktop Activity Data Monitor

Python, SQLite

- Built a desktop application to track active versus idle system time, storing structured logs in an SQLite buffer for subsequent visualization and productivity analysis.

Math PDF Data Extraction

Python, PyTorch, Nougat

- Developed an OCR utility using Meta's Nougat model to transcribe complex mathematical formulas from scientific PDFs, structuring the data into Markdown for easier quantitative analysis.

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
- **Java (Basic) Certification** – HackerRank
